

A Fully Open Access Journal

Advances in Continuous and Discrete Models

Editors-in-Chief: Harbir Antil, Xue-Cheng Tai, Enrique Zuazua

Computational and applied mathematics along with data science play a vital role in contemporary society by driving innovation. This success can be attributed to revolutionary theoretical and algorithmic developments in machine learning, data driven modeling, differential equations, numerical analysis, scientific computing, control, optimization, and computing resources together with new tools to deal with uncertainty and randomness.

This journal encourages new research in these broad areas. In addition to research on algorithmic and analytical developments, the journal also encourages papers related to (but not limited to) broad applications in Signal and Image Processing, Computer Vision, Materials Science, Mathematical Biology and Bioengineering. As a result, the journal will be an excellent connecting bridge between mathematical research and real world applications.

The journal accepts high-quality articles containing original research results and survey articles of exceptional merit.

Area Editors:

Numerical Analysis & Scientific Computing:

Gianluigi Rozza, *SISSA – International School for Advanced Studies*

Partial Differential Equations:

Verena Bögelein, *University of Salzburg*

Data Analytics:

Holger Rauhut, *RWTH Aachen University*

Optimization:

Thomas Surowiec, *Philipps-Universität Marburg*

Control:

Martin Lazar, *University of Dubrovnik*

Stochastic Modeling, Analysis & Uncertainty Quantification:

Qi Lü, *Sichuan University*

Mathematical Biology and Bioengineering:

Benedetto Piccoli, *Rutgers University*

Signal and Image Processing:

Stacey Levine, *Duquesne University*

Computer Vision:

Wanquan Liu, *Sun Yat-sen University*

Materials Science:

Silvia Budday, *Friedrich-Alexander-Universität Erlangen-Nürnberg*

Benefits of Publishing:

- High global visibility
- Worldwide multidisciplinary scientific community
- Fully open access with all articles freely available to read
- Article-level metrics available, allowing you to track the impact of your work

Visit the journal home page to:

- See the latest journal metrics
- Sign up for free Table of Contents alerts
- Get to know the complete Editorial Board
- Find detailed Aims & Scope and instructions for authors
